OTHER VERDE ARTIFICIAL GRASS PRODUCTS

SUPER VERDEGRASS is a very dense, hardwearing 12mm artificial grass. It can be used for pathways & steps on golf courses, bowling green banks, gym sled runs & commercial areas.

VERDEGRASS is a curled 9mm carpet-like artificial grass that can be used for practice putting mats, exhibition flooring, swimming pool surrounds, bowling green banks & grave surrounds.

SUPER VERDETURF is a 15mm non directional artificial grass used for practice putting greens in the garden. This requires a sand infill which controls the speed of the surface.

VERDETURF is a 20mm straight artificial grass used for golf course pathways, bowling green ditches & Multi-use Games Areas (MUGA). Verdeturf needs a sand infill for all applications.

SUPER VERDELUXE is a 45mm hybrid dense grass used for winter golf tees & touchline areas in football / rugby. A high sand & rubber infill is needed for these applications

VERDELUXE is a 28mm hybrid dense grass was designed for adventure golf surrounds & can also be used for domestic lawns. This product has an optional sand infill.

ADHESIVE PRODUCTS

Verde Grass Stick Green is a 310ml cartridge to be used with our Verde Cartridge Gun. The adhesive can be used with artificial grass, jointing tape & shock-pads. A full cartridge will cover 3m of Verde Jointing Tape or create a 10m bead. The adhesive is flexible and easy to use. For use in **dry / damp conditions only**.

Verde Lawnfix is a 310ml green cartridge to be used with our Verde Cartridge Gun. The adhesive can be used with artificial grass, jointing tape & shock-pads. A full cartridge will cover 3m of Verde Jointing Tape or create a 10m bead. Perfect for use in **wet conditions**.

Verde Cartridge Gun is designed to take a 310ml cartridge into the gun. It helps minimise wasted adhesive & is essential for applying the adhesive to the grass, tape or shockpad.

Verde Jointing Tape is supplied in lengths up to 100m by 300mm wide. The tape is for use with our Lawnfix or Grass Stick to join artificial grass. The tape must be shiny side down to stop the water from coming up through the tape & ruining your join.

Verde Multi-Fix is a 2 part adhesive that only becomes tacky once the two components have been mixed.

This adhesive can also be used with jointing tape for large joins & can be used as a spot adhere /an all over stick.
